

--/--/---  
Proposed C163mari

## SCHEDULE 2 TO CLAUSE 42.01 ENVIRONMENTAL SIGNIFICANCE OVERLAY

Shown on the planning scheme map as ESO2.

### SIGNIFICANT TREES

#### 1.0 Statement of environmental significance

--/--/---  
Proposed C163mari

The *Maribyrnong Significant Tree Register (2019)* identifies trees which have special significance. The trees have been identified as significant for a variety of reasons, including their horticultural, aesthetic or historical value; because they are rare, old or in a particular location or context; because they are an outstanding size or are a curious growth form; because they have outstanding habitat or environmental value; or because of their connection to Aboriginal culture.

The trees contribute to the character and amenity of local areas and, collectively, to the City's urban forest.

#### 2.0 Environmental objective to be achieved

--/--/---  
Proposed C163mari

To preserve and enhance trees with significance identified in the *Maribyrnong Significant Tree Register (2019)* and listed in the table to this schedule.

#### 3.0 Permit requirement

--/--/---  
Proposed C163mari

A permit is required to construct a fence.

A permit is not required to:

- Subdivide land unless the alignment of the title is within the Tree Protection Zone (TPZ) of a tree listed in the table to this schedule.
- Prune trees for maintenance purposes provided that the branch size is no more than 10 centimetres in diameter and the total amount removed is not more than 10 per cent of the canopy in accordance with *Australian Standard – Pruning of Amenity Trees*, AS4373-2007.
- Remove, destroy or lop any vegetation not listed in the table to this schedule.
- Remove, destroy or lop any vegetation in accordance with a plan approved under a Schedule to the Development Plan Overlay.

#### 4.0 Application requirements

--/--/---  
Proposed C163mari

The following application requirements apply to an application for a permit under Clause 42.01, in addition to those specified elsewhere in the scheme and must accompany an application, as appropriate, to the satisfaction of the responsible authority:

- A report from a qualified arborist identifying:
  - A plan showing the location of the tree to be removed, destroyed or lopped, including the TPZ and Structural Root Zone (SRZ).
  - Where a tree is proposed to be removed, destroyed or lopped as a result of buildings and works, a plan showing the tree in the context of the buildings and works with the TPZ and SRZ clearly defined, including the protrusion of the buildings and works into the TPZ and SRZ.
  - Where a tree is proposed to be removed, the location of any replacement tree planting with associated TPZ which ensures its growth to maturity.
  - Details of the tree to be removed, destroyed or lopped, including its height, canopy, spread, trunk diameter, age, health, safe useful life expectancy and structure.
  - The retention value of the tree.

- The reason for the proposed work.
- Whether there are options for alternative treatment.
- What remedial or restorative action is proposed.
- The qualifications of the arborist.
- A timetable of when the proposed works are to be undertaken.
- Where buildings and works are proposed, detailed methods for tree protection during and following the buildings and works.

## 5.0

--/--/---  
Proposed C163mari

### Decision guidelines

The following decision guidelines apply to an application for a permit under Clause 42.01, in addition to those specified in Clause 42.01 and elsewhere in the scheme which must be considered, as appropriate, by the responsible authority:

- The effect of the development on the tree, including the protrusion of the development into the TPZ and SRZ and the impact on the tree's ability to grow to maturity.
- The height, canopy, spread, trunk diameter, age, health, safe useful life expectancy and structure of the tree.
- The existing use and development of the land, including the ability for the use and/or development to be located elsewhere on the land to limit impacts on the tree.
- Whether the proposed buildings or works will result in damage to the tree by means of damage to roots, changes to soil drainage or by any other means.
- Where the removal, destruction or lopping of a tree is proposed, the reason for the removal, destruction or lopping of the tree.
- Where buildings and works are proposed, whether alternatives, including the redesign or relocation of buildings and works, are possible.
- Any report that identifies, describes or deals with the tree, including the *Maribyrnong Significant Tree Register (2019)*.
- Any report provided by a suitably qualified arborist.
- Where the removal of a tree is found to be appropriate by the responsible authority, the proposed replacement tree(s) and conditions to enable the tree's growth to maturity.

# MARIBYRNONG PLANNING SCHEME

Table to Schedule 2

Tree ID No	Address of significant tree	Other affected properties	Location of significant tree	Type of tree	2019 TPZ radius (m)	Planning Scheme Map No
2	93 Stephen Street, Yarraville	4, 6 and 8 Ducker Street, Yarraville 2/8A and 8B Lennox Street, Yarraville	Rear setback	<i>Schinus molle</i> Peppercorn Tree	13.08	12ESO
6	21 Mackay Street, Yarraville	19 and 23 Mackay Street, Yarraville	Rear setback	<i>Cinnamomum camphora</i> Camphor Laurel	11.04	8ESO
9	22 Murray Street, Yarraville	1/11, 2/11 and 13 Goulburn Street, Yarraville	Rear setback	<i>Grevillea robusta</i> Silky Oak	10.2	12ESO
